

# **ME601 Advanced Finite Element Methods**

---

Credit: 3-0-0-3

Approval: Approved in 2nd Senate

Prerequisites:

Students intended for: MS/PhD

Elective or Compulsory:

Semester: Odd/Even:

## **Course Outline:**

Basic concepts: The standard discrete system, Finite elements of an elastic continuum-displacement approach, Generalization of finite element concepts- weighted residual and variational approaches. Element types: triangular, rectangular, quadrilateral, sector, curved, isoparametric elements and numerical integration. Automatic mesh generation schemes. Application to structural mechanics problems: plane stress and plane strains. Axisymmetric stress analysis, introduction to three dimensional stress analysis. Introduction to use of FEM in steady state field problems- heat conduction fluid flow and non linear material problems, plasticity, creep etc., Computer procedure for Finite element analysis
