Press release

IIT strongly condemns attempts to tarnish its image

MANDI IIT Mandi strongly condemns the attempts being made to tarnish its image by spreading misinformation through print, electronic and social media. Right from its inception, IIT Mandi has been striving to excel in academics and contributing to the development of the Himalayan region through academic and industrial research. Within a short span of few years, the Institute has contributed immensely to the economic upliftment of the region by providing employment and business opportunities to significant number of local people. Employment and business generation is also being promoted by setting up business incubators.

It is highly unfortunate that attempts are being made by a few disgruntled elements to subvert the process of setting up an academic institution of global reputation in the state of Himachal Pradesh. As an Institute of national importance, IIT Mandi takes extreme care in all administrative matters and diligently follows due procedures. The Institute follows a strict equal opportunity policy and does not discriminate anyone by any count. Information that is being spread in contrast to these are with malicious intent.
