

ALGORITHM FOR COVID-19 POSITIVE CASES IN IIT MANDI CAMPUS

- Any suspected case from among resident mess worker/service provider will be shifted to B-26 to be isolated from mess/canteen immediately. Same protocol as above for quarantine centre will be applied for further management. Additionally, all other workers need to be isolated/quarantined in their respective area of stay, if the suspected case is tested positive. Contact tracing and containment will be done as per the government protocols/instructions.
- Mess/canteen needs to be closed temporarily, **if any worker is tested positive.** Alternative arrangement for food for students will be made until clearance for reopening is obtained from district authority.
- **Isolation and treatment Centre** for (suspected cases /mild symptomatic//Pre-symptomatic/asymptomatic cases of COVID-19) will be established in the campus at B -26.
  - ✓ Four rooms towards the end of the corridor of ground floor of B-26 will be reserved for the same.
  - ✓ Separate exist and entry points will be created for these four rooms and patient will be isolated in these rooms until they are shifted to Covid care center of the government, as per district administration guidelines.
  - ✓ Individuals will be provided with a digital thermometer and pulse oximeter for monitoring their health status.
  - ✓ All other protocols of the Institute quarantine centre will be applicable for the isolation facility.
- Any suspected case from among the construction workers needs to be reported to the district authorities by the contractor with intimation to the STF Covid-19.
  - The contractor should reserve few suitable hutments for housing such suspected cases until confirmation of test results.
  - All other workers in the labour settlement should be isolated immediately for prevention of the spread.
  - Further, containment and management will be as per the instruction of the government authorities.
